

### 5Essential Survey

Central's parents, students, and teachers are being asked to participate in the Illinois 5Essential Survey at the link shown below. The survey gathers data related to five indicators that can predict important student outcomes such as improved attendance and larger test score gains. The five indicators include: effective leadership, collaborative teachers, involved families, supportive environments, and ambitious instruction. Reports will be generated for schools if more than 50% of each above population participate in the survey. The results can be viewed on Central's School Report Card next fall. Your participation could help us guide school improvement.

The Illinois 5Essential Survey link will be available through January 16th. Your participation as a parent, student, or teacher could help make Central an even better school for our community! So, click on the link and become a participant!
